

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

THE
HONGKONG DIRECTORY.

WITH
LIST OF FOREIGN RESIDENTS IN CHINA.

HONGKONG:
PRINTED AT THE "ARMENIAN PRESS."
1859.

NOTE.—The Compiler of the "Hongkong Directory" in issuing this a second number, would take this opportunity of apologising for the many errors in the previous edition; and although the present may not be free from mistakes it is hoped they are not so numerous. The delay in the publication has taken place owing to the list of Foreign residents at Shanghai having miscarried, and finally arriving too late to be included in the alphabetical list has been made up in alphabetical order at the end by itself.

Also a few corrections and additions, forwarded after the others were printed off.

HONGKONG DIRECTORY.

GOVERNMENT OF HONGKONG.

CIVIL ESTABLISHMENT.

H. E. SIR JOHN BOWRING, Kt., LL.D., *Governor and Commander-in-Chief of the Colony of Hongkong and its Dependencies, and Vice-Admiral of the same, Her Majesty's Plenipotentiary and Chief Superintendent of the Trade of British Subjects in China.*

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million. The number of people who are malnourished has increased from 1.1 billion to 1.5 billion. The number of people who are obese has increased from 100 million to 300 million.

There is a growing awareness of the need to address the problem of malnutrition. The World Health Organization (WHO) has launched a global strategy to reduce malnutrition. The strategy is based on three pillars: (1) improving the quality of food, (2) increasing the availability of food, and (3) improving the access to food. The WHO is working with governments and other organizations to implement this strategy.

One of the key challenges in addressing malnutrition is the need to improve the quality of food. This is because many people in the world are consuming diets that are high in calories but low in nutrients. This is often due to the fact that many people are consuming diets that are based on refined grains and processed foods. These diets are often high in calories but low in fiber, vitamins, and minerals.

Another key challenge is the need to increase the availability of food. This is because many people in the world do not have access to enough food. This is often due to the fact that many people live in rural areas where there is a lack of infrastructure and resources. This makes it difficult for them to grow their own food or to access the markets.

Finally, another key challenge is the need to improve the access to food. This is because many people in the world do not have the money to buy food. This is often due to the fact that many people live in poverty. They do not have enough money to buy the food that they need to survive.

There are many ways to address these challenges. One way is to improve the quality of food. This can be done by promoting the consumption of whole grains, fruits, and vegetables. Another way is to increase the availability of food. This can be done by providing people with the resources they need to grow their own food. Finally, another way is to improve the access to food. This can be done by providing people with the money they need to buy food.

There are many organizations that are working to address the problem of malnutrition. These organizations include the WHO, the United Nations, and many other groups. These organizations are working to implement the WHO's global strategy to reduce malnutrition. They are also working to provide people with the resources they need to improve their diets and to access the food that they need.

It is important to remember that malnutrition is a global problem. It affects people in every part of the world. We need to work together to address this problem. We need to improve the quality of food, increase the availability of food, and improve the access to food. Only then can we hope to reduce the number of people who are malnourished.
